Stream Master by Lovense Guide

Step 1: Downloading Stream Master

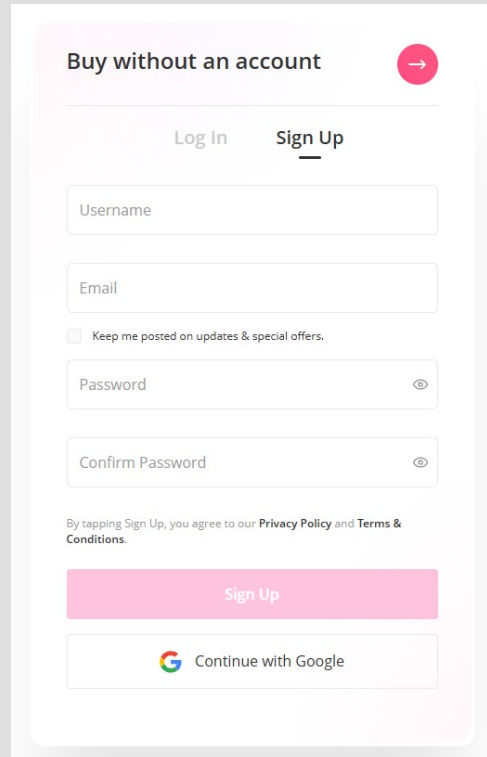

Access lovense website : <https://lovense.com/stream-master> and download Stream Master for your device.

Follow the steps of installation and open Stream Master.

Step 2: Create Lovense Account

Access lovense website : <https://www.lovense.com/user/> and follow the steps to create an account.

The screenshot shows a mobile app interface for creating a Lovense account. At the top, there is a pink header with the text "Buy without an account" and a right-pointing arrow icon. Below this, there are two links: "Log In" and "Sign Up", with "Sign Up" being the active link. The form contains several input fields: "Username", "Email", "Password", and "Confirm Password", each with a toggle icon for visibility. There is also a checkbox labeled "Keep me posted on updates & special offers." Below the form, there is a pink "Sign Up" button and a "Continue with Google" button with the Google logo.

Step 3: Add xlovecam.com website in Stream Master

From the menu , click on Cam Site .

Search Xlovecam , select it from the list , and click on “Done” button.

The screenshot shows the Stream Master V1.9.3 interface. The top navigation bar includes the Stream Master logo, a version number, an affiliate earnings banner, and a search bar. The left sidebar menu lists various features: Home (with an 'event' badge), Cam Site (highlighted with a red circle and '1' and a 'Click' tooltip), Chatbox, App Gallery, Visuals, Sound Board, Insights, Cam101, and Stream on Mobile. The main content area displays a 'Welcome to Lovense Cam Extension' banner with a colorful illustration of a person and a chat window. Overlaid on the right is the 'Add A Cam Site' dialog box. This dialog box has a title bar with a close button. It contains a 'Cam Site Name' input field with 'XLovecam' entered, followed by a red circle with '1' and a 'Type' button. Below this is a list of suggestions, with 'XLovecam' selected, indicated by a red circle with '2' and a 'Select' button. There is also a radio button option for 'Use site default settings'. At the bottom right of the dialog box, there is a 'Click' tooltip and a red circle with '3' next to a 'Done' button.

Step 4: Connect your lovense sex toy – PC Version

Turn on your lovense sex toy.

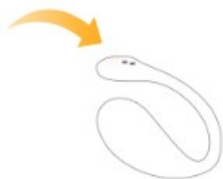

Be sure that the toy's battery is charged.

On Stream Master , go to Toy Status → Connect by PC.

Once the toy has been found , click on “Done” button.

Generate Image

On the same page , at default settings
 The models have the possibility to generate an image with informations about levels of the toy , duration of the vibrations , power etc.
 This image can be used for example in their personal space.

Or the models can send this image to the Fan list in private message.

They have to click on “Generate image” button and then to download the generated image on their pc’s.

This is an optional step , give information only if models request it.

Loveense Toys Respond to Tips

Models can create their own levels. Here are my levels:

	Tip	Toy	Time	Power	Pump /
LEVEL1	10~19	lush	2	Low	-----
LEVEL2	20~49	lush	5	Medium	----
LEVEL3	50~99	lush	10	Medium	----
LEVEL4	100~199	lush	25	High	----
LEVEL5	≥200	lush	60	Ultra high	----

Special Commands

Tip **300** tokens ⇒ Send **10** seconds earthquake pattern

Tip **320** tokens ⇒ Send **10** seconds fireworks pattern

Tip **250** tokens ⇒ Send **30** seconds wave pattern

Tip **260** tokens ⇒ Send **10** seconds pulse pattern

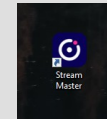

Cancel

Download **1** Click

Step 5: Start streaming at xlovecam.com

The models must use the browser tool “Stream Master”, not the regular browsers Chrome or Firefox. To log in the model account they must copy and paste the connection link in Stream Master. If they are using the regular browser, then the toy will not be connected with the interface.

Extension Settings x Copy and paste the link in a new tab on Stream Master!

After connecting in model account , Press “Start your show now button”

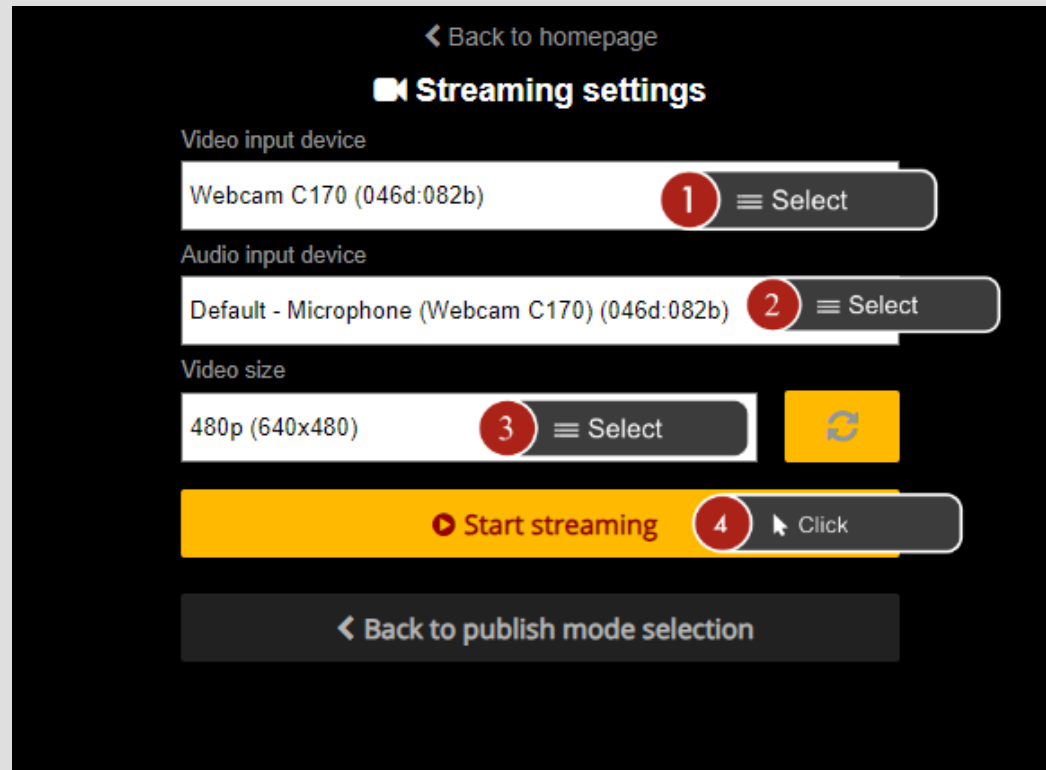

The screenshot shows the XLoveCam Model manager 2 dashboard. The browser address bar is `model2.xlovecam.com/en`. The dashboard features a sidebar with navigation options: Home, Payment settings, Model Profile, Customers, Messaging, Shows & Profits, Camrank & Top 5, My account (with a notification badge), Customer referral, and My Link.cam page. The main content area includes a profile card for a model in the 'Ladies' category, a 'Start your show now' button, and three informational boxes: 'Registration being validated', 'You have not yet selected a payment method', and 'Your profile picture is not uploaded'. At the bottom, there are two charts: 'Detail of your sales per day' (a bar chart showing earnings of 1.5 on 7 Nov) and 'Detail of your sales by show type' (a pie chart showing a total of €1.55, with a 'Bonus Online' category).

Press “Allow on every visit”

The screenshot shows a browser window with the address bar displaying "model2.xlovecam.com/en/livechat/stream/#v2". A permission dialog box is open, titled "model2.xlovecam.com wants to", with a close button (X) in the top right corner. The dialog lists two permissions: "Use your camera" and "Use your microphone". Below the list are three buttons: "Allow this time", "Allow on every visit", and "Don't allow". A red circle with the number "1" is placed over the "Allow on every visit" button, and a grey callout box with a mouse cursor icon and the word "Click" points to it. In the background, a dark page is visible with a "Back to homepage" link at the top right, a "Streaming device permissions" heading, and text indicating that the browser is detecting connected streaming devices and waiting for user input to allow camera and microphone access.

Choose the streaming devices that you are using , and the desired video size

The screenshot shows the 'Streaming settings' interface. At the top, there is a link '< Back to homepage'. Below it is the title 'Streaming settings' with a camera icon. The settings are organized into three sections: 'Video input device', 'Audio input device', and 'Video size'. Each section has a dropdown menu and a 'Select' button. The 'Video input device' dropdown is set to 'Webcam C170 (046d:082b)' and is marked with a red circle '1'. The 'Audio input device' dropdown is set to 'Default - Microphone (Webcam C170) (046d:082b)' and is marked with a red circle '2'. The 'Video size' dropdown is set to '480p (640x480)' and is marked with a red circle '3'. To the right of the 'Video size' dropdown is a yellow refresh button. Below these settings is a large yellow 'Start streaming' button with a play icon, marked with a red circle '4' and a mouse cursor icon. At the bottom, there is a grey button '< Back to publish mode selection'.

Start streaming 4 Click

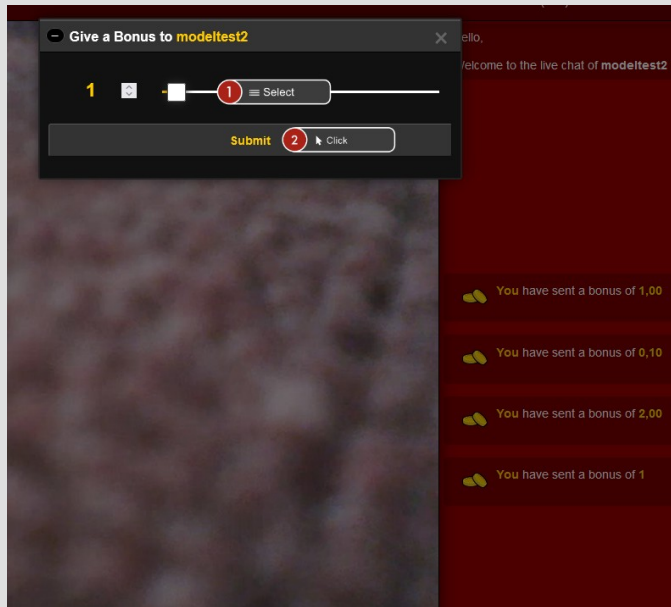

< Back to publish mode selection

Click on the toy icon , then click on Stream Master.

Next time when you are connecting in live streaming , if you are using the PC , then the toy will be automatically recognized by the streaming interface.

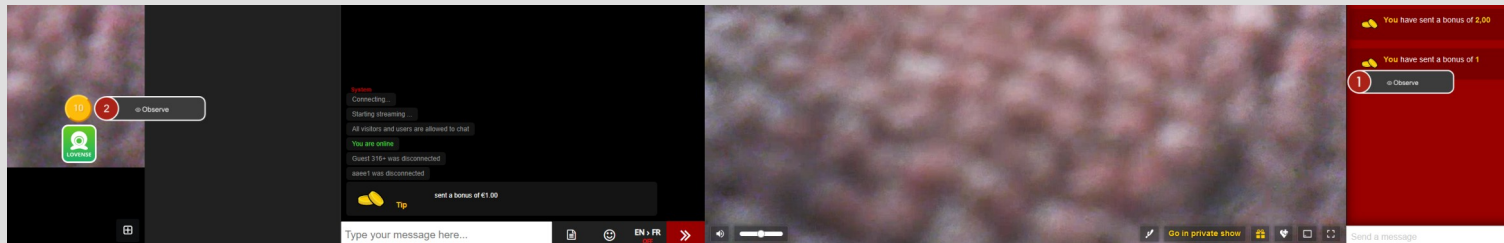

After clicking on stream master , a window will pop-up with informations about tips , vibrations etc.

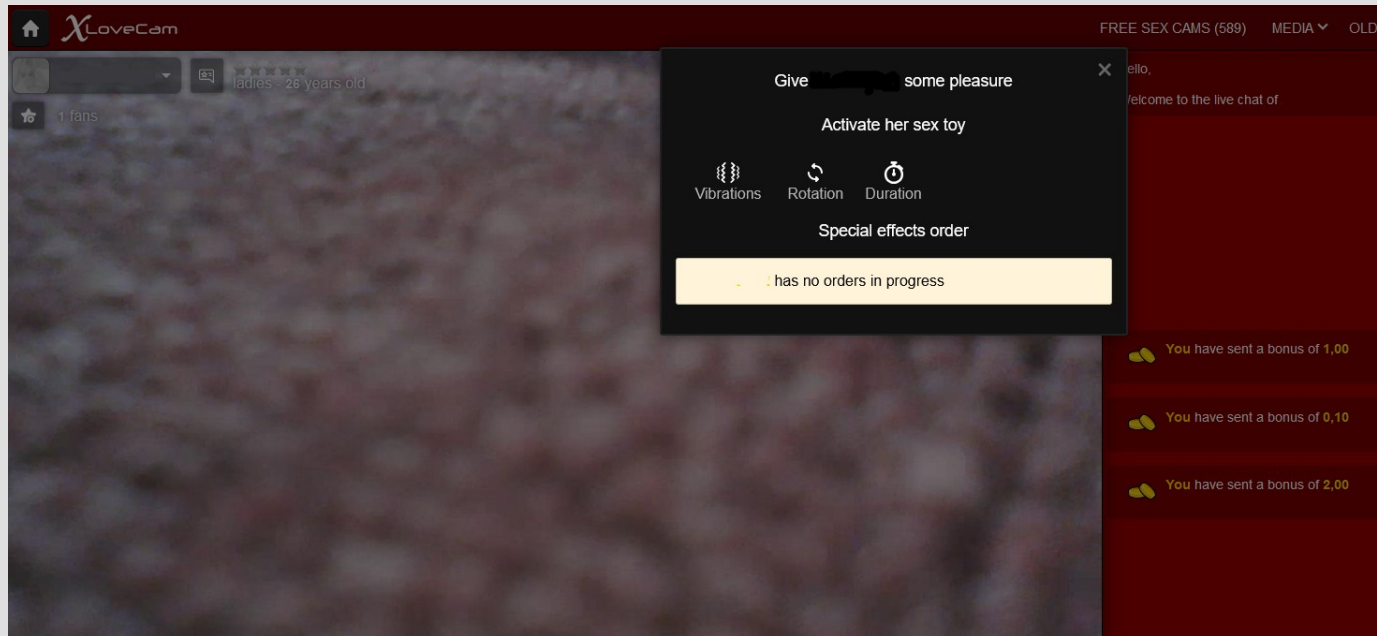

User's side

When the toy is connected with Stream Master , the Users will be able to send only bonuses.
There is no vibrations menu here , as the toy is reacting and vibrating by taking into account the amount of bonus sent.

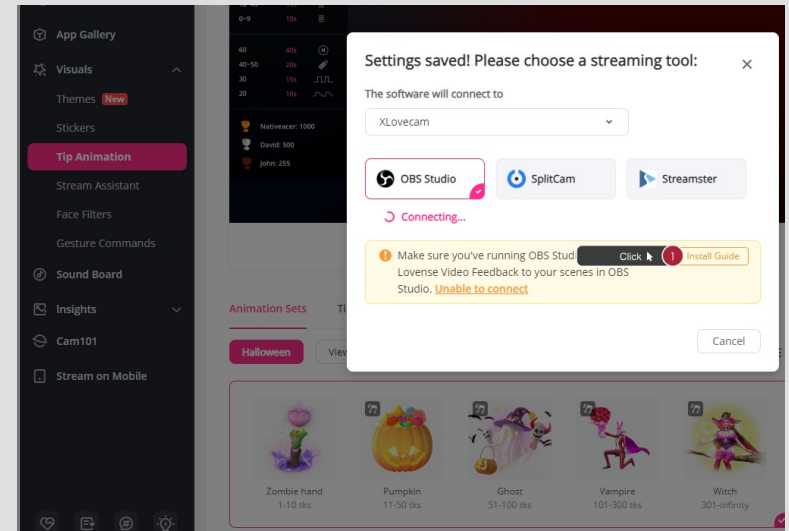

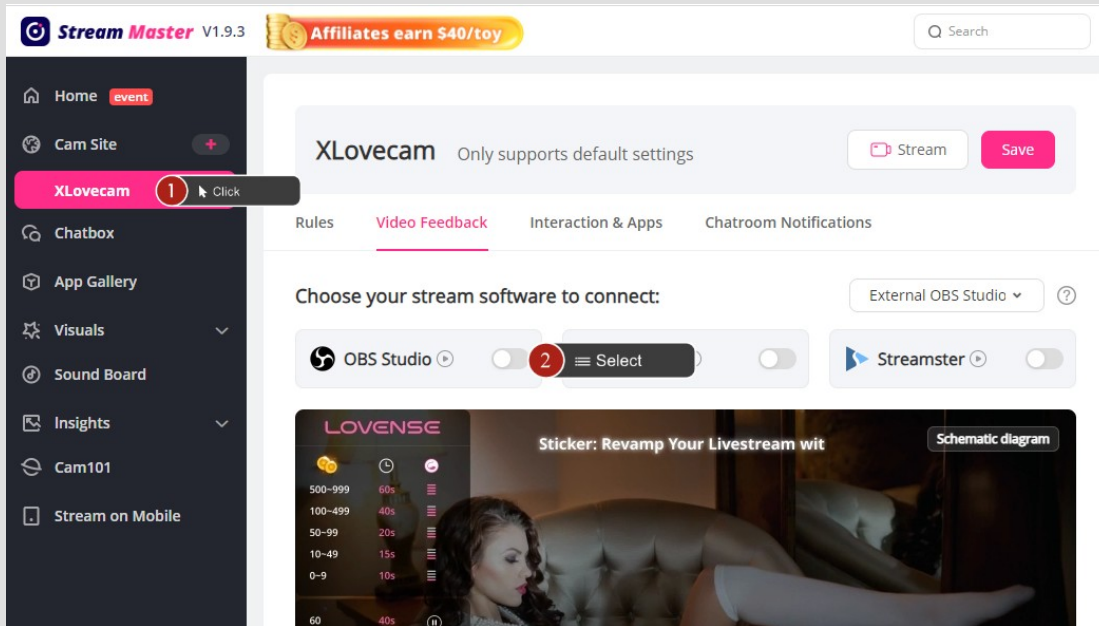

This menu is not available for the users , because the model is not using OBS Software.
You will see later in this PDF , how this menu looks when the model is using OBS Software.

Connect using Stream Master and OBS Software

Go to Menu → Xlovecam → Enable OBS Studio

To be able to use OBS with Stream Master ,
you need to download and install Lovense OBS Studio toolset

Add your tip menu to your stream in two easy steps ✕

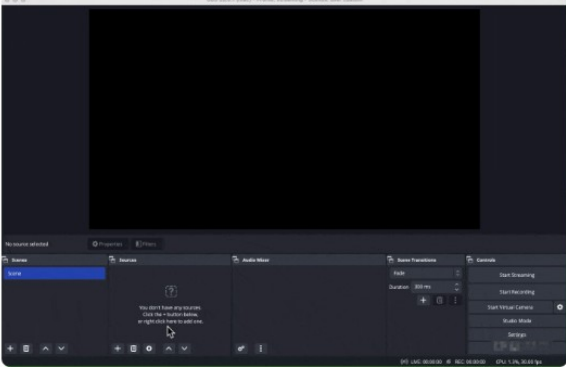

Step 1 /2 Download and install the OBS Studio

Download

Step 2 /2 Download and install the Lovense OBS Studio toolset
