You can access it [HERE](#)

Now, by default the online models list ,is sorted by Cam Rank, by language chosen by the users on the website.

For example, if a user chooses French language, then the models will be displayed by taking into consideration the value of Cam Rank by French language.

To see this, go to a model account, Menu -> Cam Rank & Top5 -> Cam Rank -> and choose for example CamRank - language FR, and you will see how high/low is the Cam Rank when the user chose FR as language on the website.

If the user choses a language that is not in this list , then will be taken into consideration the Global Cam Rank.

The screenshot displays a model's profile on the left and the CamRank settings on the right. The profile for 'modeltest1' includes a category of 'Young women', age 20, a 5-star rating with 6 votes, 10 fans, and 0 loves. The CamRank menu is open, showing options for 'Global CamRank' and 'CamRank - Language FR'. Below the menu, there are several performance metrics with bars and a 'Observe' button.

**CamRank**

The camRank is an internal performance index, calculated on a scale to 100 and is calculated on a wide range of data, which allows you to compare yourself with other performers. This camRank is important for the XLoveCam platform and also for you because it is used as a default sorting tool in the list of connected performers for visitors (so the higher your camRank is, the higher you appear in the list. It is calculated daily for an average over the last 30 days, globally and by customer input. The way camRank is calculated is regularly improved and can affect your overall score or your score per language. Take the time to study your data to improve your sales!
