Is a great method to create fans , who most likely will come visit your room chat , give bonuses and buy your VIP content.

Promotion on Snapchat is all about being social.

Here you can create a free/public Snapchat account and keep it maintained.

Treat it more like a personal account (but still make it dedicated for your cam girl job) , and post snaps about your daily life as cam girl.

You can post playful non-nude shots , but not more than this as Snapchat is strict about adult content , so try not to get banned.

Public Snapchat account doesn't generate so much traffic , Twitter is meant for this. Snapchat is great for warming up your fans.

Try to do a profile where you will post normal pictures , so that fans will get to know you as human being , and not as a sex object. This is important as it will make them feel closer to you and this is far more likely for them to become your regulars.

As an idea , you can use link.cam to share your snapchat account , like this your fans could find you.
