Subject:

- 1. Build your “Tip Menu”*
- 2. Live Cam Games*
- 3. Role-play ideas and scenarios*

xLoveCam offers an Actions Panel feature where models can customize paid actions visible to users during both free and private sessions.

- Models can choose from 1 to 5 items from categories like Virtual Gifts and Live Actions plus 3 options at Interactive Sex Toy—specifically, “Short Vibration” “Long Vibration” and “Very Long Vibration.”
- Models set the credit cost for each action individually.

2. Live Games – concept

The Live Cam Games are a powerful strategy to increase user engagement and earnings. Here are more reasons to use them in your live streaming:

- Encourage users to send bonuses
- Games incite the users to send small but many bonuses or frequent live actions
- Instead of waiting for one big spender, you will make many users to contribute small amount, which often adds up to more earnings
- Create suspense & fun by adding an element of excitement to your live show
- Suspense keeps users to stay longer on your live chat, waiting for the outcome of the game
- Interactive games can give the possibility to your fans to feel like they're in charge of the show
- When users feel in control, they will most likely spend more to see their choices happening
- Instead of tipping alone, users can feel part of a team working to get a sexy reveal → this increases competition and peer pressure to send bonuses.
- A model with games appears more creative, entertaining, and professional, which will make users want coming back
- Games make shows feel fresh and dynamic rather than repetitive
- Regulars users come back because they know you will entertain, not just undress
- Games give you a way to slow down or extend the show until your „goals” are met
- Instead of rushing to nudity, you can monetize the teasing process
- Most men enjoy games (in general) especially if there are erotic prizes

To summarize, what you can win:

- More Credits → by turning users into active players.
- Longer Sessions → users stay to finish games and earn the “prizes”.
- Loyal Fans → users who will feel entertained will definitely come back regularly.
- Less Pressure → games make “sending bonuses” feel natural instead of awkward “begging”.
- Fun & Variety → it is entertaining for you too.

👉 In short: games transform a passive audience into active participants. That’s where the money is — interaction, not just visuals.
